Creating a Fill in Multiple Blanks Question

Last updated: 7/19/2012

Fill in multiple blanks questions builds on Fill in the Blank Questions, but with multiple blanks to be filled in a sentence or paragraph. Separate sets of answers are defined for each blank.

This question type can be useful if there are multiple variables, such as listing the three colors on the Italian flag or the meaning of a mnemonic.

It is also useful in foreign language classes. In this case, the identifier and adjective may be left blank in a sentence, so as not to give away the gender of an object.

1. Open the canvas page for a test, survey, or pool.

2. On the Action Bar, click on Create Question and select Fill in Multiple Blanks from the drop-down list.

3. Type the Question Text. Type each blank as a variable surrounded by square brackets. For example, William [blank_1] wrote Romeo and [blank_2]. Variables should be composed of alphabetic characters, digits (0-9), periods (.), underscores (_) and hyphens (-). All other occurrences of the opening rectangular brace ("[") character should be preceded by the back-slash ("\") character. Variable names must be unique and cannot be reused.

4. Click Next.

5. Select the Number of Answers for each variable.
